Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Miller et al. (US Patent # 5,796,735).

Regarding claim 17, Miller teaches Asynchronous Transfer Mode (ATM) system (column 3, lines 11-15) comprising: a Segmentation and re-assembly (SAR) queue configured to store information from a host (column 9, lines 53-65); and SAR circuit configured to write to the host to indicate where the SAR circuit is reading from the SAR queue and to transfer a first cell payload between the host and the SAR circuit in response to the information in the SAR queue (column 9, lines 66-67; column 6, line 63-column 7, lines 1-8; see Figs. 3a and 3b).

Regarding claim 18, Miller teaches that the SAR circuit is configured to write to the host to indicate where the SAR is writing to a host queue (column 9, lines 66-67).

Allowable Subject Matter

Claims 19-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-16 are allowable.

The following is a statement of reasons for the indication of allowable subject matter: As to claims 1-16, the prior art of record does not teach the method comprising: writing from the host to the SAR to indicate where the host is reading from the host queue.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Boakye whose telephone number is (571) 272-3183. The examiner can normally be reached on M-F from 8:30am to 6:00pm.
